OUR PERSPECTIVE

"We aim high and build quality, trust and value."

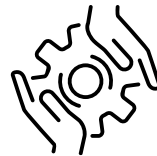

We respect and protect people,
environment and all living creatures.

We work with the right budget
without compromising quality.

We establish a relationship
of trust with our customers.

We work together with our
expert solution partners.

We operate with the help of
the perfect mix of knowledge
and experience.

We identify all risks, manage them and take necessary measures.

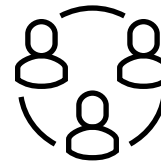

We meet the deadlines and deliver on time.

We focus on satisfaction and adopt a solution oriented approach.

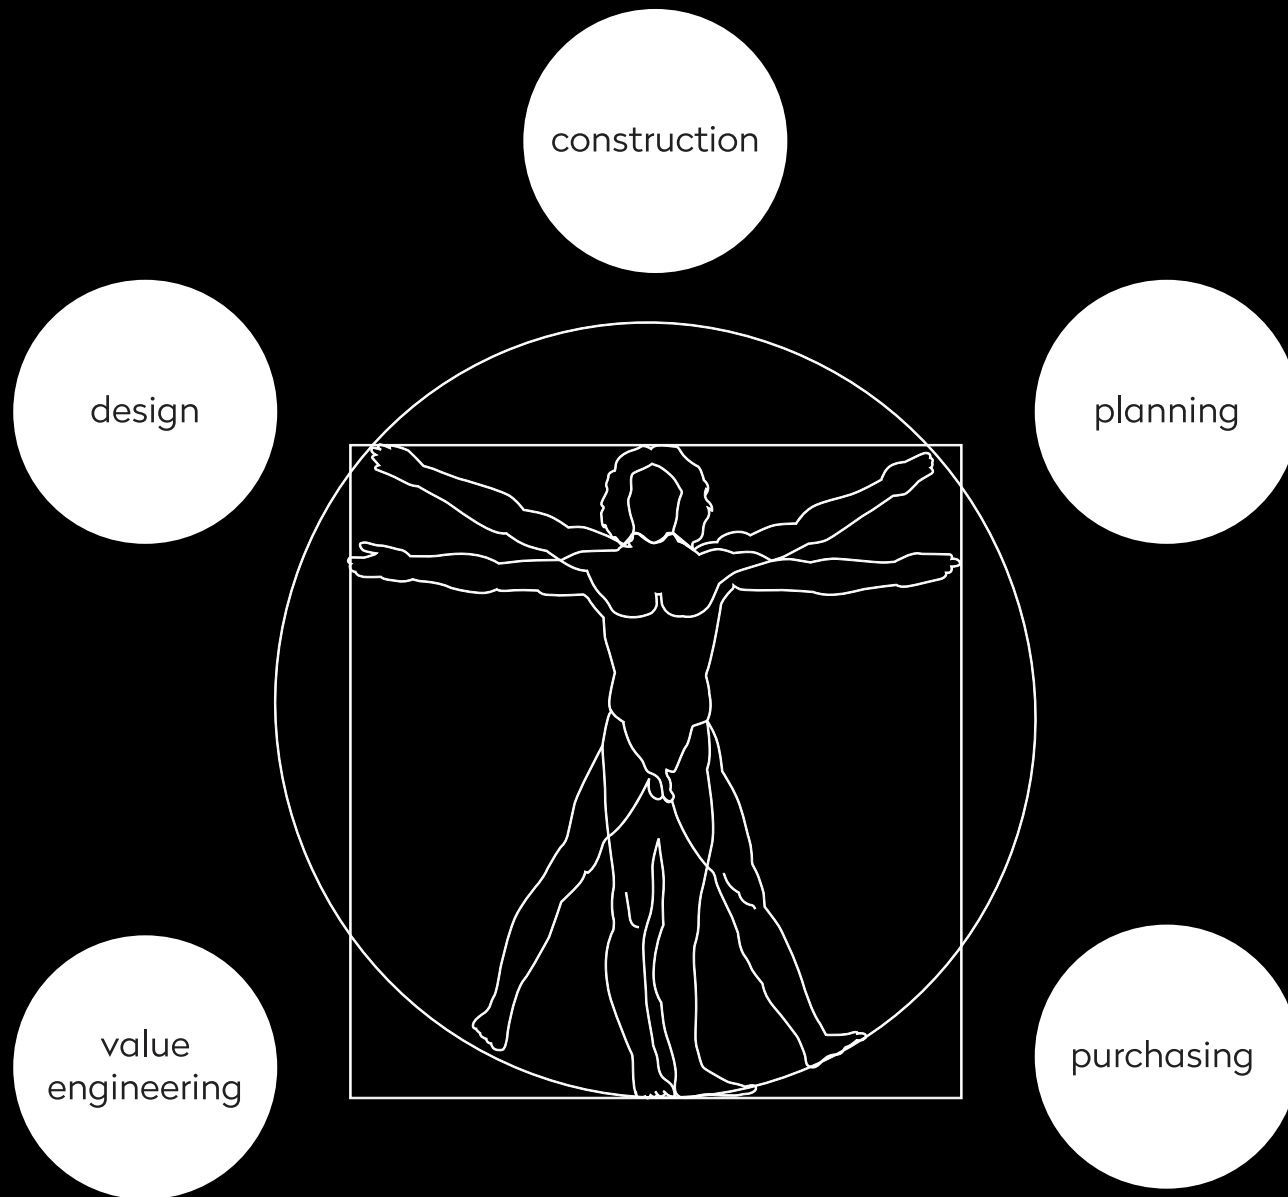

We have strong work ethics.

We help others improve while we improve ourselves and add value to our business partners.

OUR SKILLS

OUR EXPERIENCE

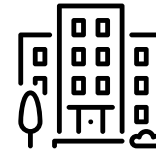

industrial buildings

commercial buildings

02

residential buildings

03

renewable
power plants

04

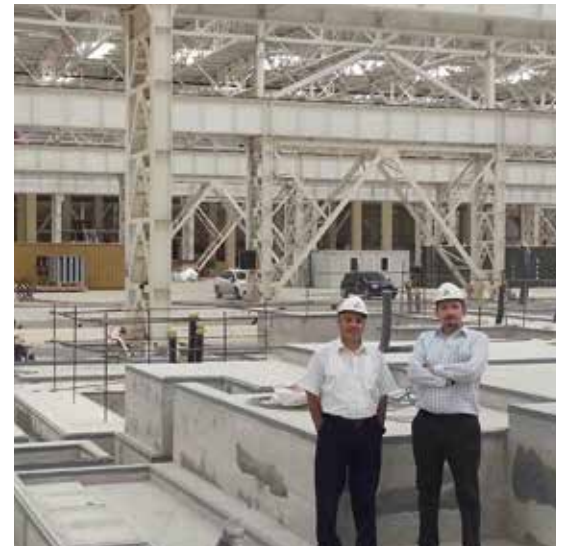

industrial buildings

Our company has worked as the solution partner
of local and international industrial investors for the last 30 years
and contributed to more than 1 million m² of industrial plants
and structures. We have made immense contributions to these
innovative industrial buildings which have grown fast in these 30 years.

2017
6.000 m²

renewable power plants

We are fully aware of the global climate change and its impacts.

We have realized the importance of renewable energy thanks to the windmills
we built in Kilyos and Bandırma and we plan to be the solution partner
of clean energy projects in Turkey and in the world.

OUR STORY

Everything starts with education so does our story...

The founders of Bonzet Construction started their career lives during their childhood in their family companies.

After successful graduation, the founders realized many prestigious projects both in family businesses and in some reputable companies of Turkey (such as Klima Construction, Bahadır Construction, Ata Holding, Maya Holding, Altınbaş Holding, Yapı Merkezi) as top executives.

They established Bonzet Construction in 2011 with their experiences based on their careers which are full of achievements and also their professional approach coming from their own family business.

Even though, the Engineer Msc. and Industrialist Mim Suat Müftüler (founder of the construction and machinery industry companies established by in 1950) and Ahmet Yılmaz Turfanda (founder of Yılmaz Elektrik and Contracting Companies in 1960) could not witness of these days, their business ethics, experiences and professional approach (that they conducted to their next generations) become Bonzet's eternal inspiration and solid core values.

These experiences, values and corporate culture, strengthened by working with the most excellent investors inside the country and abroad, continue to increase in the Bonzet Construction family.

OUR PHILOSOPHY

Good for the People, Beneficial for the Humanity

We believe that nothing done for people should harm humanity. Therefore we build environmentally friendly, long lasting structures that are beneficial not today but also tomorrow. We invest in people, and feel responsible to raise new generations that will continue our corporate culture. Building on our legacy, we work to ensure a more livable environment for next generations.

With Exemplary Values of the Past, Works to Set Example for the Future.

While building new structures using our values inherited from the past such as honesty, quality and moral conduct, we establish business partnerships with a reliable brand. We leave our legacy of stylish, functional and lasting architectural and engineering structures.
